Web developer with an eye for design and a proven ability to communicate, adapt, and learn on the fly. I excel in fast paced, collaborative team environments that require attention to detail, hard work, and the ability to adapt. My objective is to join an entrepreneurial web development team with a focus on mobile-first design and building a better web-experience.

Remote Work Experience

My recent certification in Full Stack Web Development was completed remotely. We utilized Slack and zoom for class meetings, tutoring sessions, and group meetings. In addition, we utilized GitBash and GitHub for version control and source code management. I gained relevant experience developing projects remotely utilizing these technologies and successfully completed three functioning group projects referenced below: 'YardPal', 'Myriad', and 'Is It Open?' Please visit both the deployed site and github repository for each!

Technical Skills

- HTML5
- CSS
- Javascript/ES6
- MongoDB
- ReactJS
- jQuery
- Bootstrap
- NodeJS
- Express
- Express-HandleBar
- Git/GitHub
- MySQL

Projects

Yard-Pal | Repo: <https://github.com/diuguide/yard-pal>, Link: <https://yard-pal.herokuapp.com/>

- ❑ MERN-Stack retail app utilizing authentication to create individualized "yard sales" online.
- ❑ Developed and implemented front-end design
- ❑ Coordinated with back end team on testing routes facilitating integration into front end design
- ❑ HTML/CSS/Java, Bootstrap 4, Express, ReactJS, MongoDB, NodeJS

Is It Open? | Repo: https://github.com/diuguide/is_it_open, Link: https://diuguide.github.io/is_it_open/

- ❑ A web-api search application where users can search for local business info with matching covid-19 data.
- ❑ Designed front-end layout, structured backend code to support search functionality
- ❑ HTML/CSS/Java, jQuery, Ajax/API

Myriad | Repo: https://github.com/diuguide/symptom_tracker, Link: <https://symptomtracker2.herokuapp.com/>

- ❑ A patient symptom tracking app. Create, update, and export personal symptom records for review by medical professionals.
- ❑ Collaborated with team members on front-end and back-end design.
- ❑ HTML/CSS/Java, Bootstrap 4, Express, Express-Handlebars, MySQL, NodeJS

Weather Map | Repo: https://github.com/diuguide/weather_map, Link: https://diuguide.github.io/weather_map/

- ❑ Weather search application utilizing a web-api to provide users with current and forecasted weather data for any location.
- ❑ Designed front-end layout and back-end code to support search function.
- ❑ HTML/CSS/Java, Bootstrap 4, jQuery

Education

University of North Carolina, Chapel Hill | Chapel Hill, NC

- ❑ Full-Stack Web Development Certificate, completed November 2020

Appalachian State University | Boone, NC

- ❑ Bachelors of Arts, History
- ❑ Bachelors of Arts, Spanish
